EXPERIENCE

- January 2023 – Present *Software Developer Intern, Strathmore University*
- Working here as a software developer where so far; I have worked on projects individually and in a team as well. One of the projects I worked on was an existing system which was developed using Laravel and I was therefore given the task of working on the front end of the system. Whereas for the second system I was responsible for developing the whole system by myself from the front end to deploying it on the test servers so that the users of the system could test it.
- January 2023 – April 2023 *Software Developer Intern, Bluelight Systems*
- Worked at this company remotely as an intern and got vast knowledge and experience in solving complicated problems. During my internship period I was also able to gain experience working on an existing system that used CodeIgniter framework and I was able also to improve my skills in PHP, ReactJS and JavaScript by doing the tasks which I was assigned. Overall, it was a great working experience as the organization helped me to realize the importance of working in a team.
